DEXCISS

Dairy ERP

Milking Efficiency, Churning Profits:
The Complete ERP for Streamlining Dairy Business

Streamline Your **Dairy Operations** with Our Comprehensive ERP Solution

Managing dairy operations can be complex, but our Dairy ERP makes it simple. With advanced features and a user-friendly interface, our ERP is designed to integrate all critical aspects of your dairy business. From society management to milk collection, standardization, and more, it covers every essential function.

This system offers:

- Complete transparency
- Automation
- Efficiency

These benefits ensure smoother operations and higher productivity.

Society Management

01 | **Farmer Management**
Keep track of all the farmers you work with, including their profiles, milk supply details, and payment history.

02 | **Milk Collections Society App**
A mobile-friendly app to manage milk collections from farmers, ensuring real-time data entry and instant updates.

03 | **FAT/SNF/CLR Reading Integration**
Automatically integrate FAT, SNF, and CLR readings into the system, ensuring accurate data input and quality control.

04 | **Milk Ledger**
Maintain a complete record of milk supplied by each farmer, along with FAT and SNF details for easy reconciliation.

05 | **Gate Pass for Van Delivery**
Generate automated gate passes for vans delivering milk to various locations, improving tracking and control.

06 | **Farmer Ledger**
Comprehensive ledgers for each farmer, detailing milk contributions, payments, and balances.

RMRD (Raw Milk Reception Dock)

01 **Raw Milk Reception Dock**

Streamline the process of receiving raw milk with accurate tracking of quantities, quality checks, and processing.

02 **Billing Reconciliation from FAT/SNF Variations**

Automatically reconcile billing amounts based on FAT/SNF variations to ensure fair and accurate payments to suppliers.

Van Collection

01 **GPS Based Van Tracking**

Real-time tracking of milk collection vans using GPS technology, enhancing fleet management and operational efficiency.

02 **Van Ledger**

Keep an accurate record of milk collected by each van, ensuring transparency and accountability.

Milk Standardization

01 **System Suggested SMP Addition, Water Addition, or Fat Separation**

Optimize milk composition with system-suggested adjustments like adding SMP, water, or separating fat to maintain desired standards.

02 **Inventory Control**

Ensure smooth inventory management for milk products and ingredients through the ERP's built-in control features.

Milk Routing

01 **Milk Marketing Route**

Plan and optimize your milk distribution routes to reduce costs and ensure timely deliveries.

02 **Crate Reconciliation**

Keep track of crates and packaging materials used in milk transportation,

Milk Ledger

01 **Fat in KG and Other Milk Details**

A detailed ledger capturing all key parameters such as FAT, SNF, and total milk weight in kilograms for accurate record-keeping.

Other Modules

Accounting

Fully integrated accounting module to manage all financial transactions, budgeting, and reporting in one place.

HRMS & Payroll

Manage employee records, payroll processing, and attendance with ease.

Inventory Management

Efficiently manage your raw materials and finished goods inventory, ensuring optimal stock levels and reducing wastage.

CRM & Sales and Procurement

Manage customer relationships, sales pipelines, supplier interactions, and orders while streamlining purchasing, including purchase orders and inventory.
