

Dexciss ERP for Pharmaceutical Industry

Streamlining Compliance, Accelerating Growth – The Smarter ERP for Smarter Pharma Manufacturing!

Introduction

Dexciss ERP, built on ERPNext, is a comprehensive ERP solution tailored for the pharmaceutical industry—covering everything from production planning, inventory, compliance, quality control to batch traceability. Whether you're dealing with complex formulations, regulatory audits, or global distribution, Dexciss ERP helps pharma manufacturers streamline operations, reduce errors, and ensure regulatory compliance across FDA, WHO-GMP, and other standards.

With features like real-time batch tracking, expiry management, automated quality checks, and production scheduling, pharma companies can scale with confidence while maintaining quality, safety, and efficiency. The system also helps manage multi-level BOMs, by-products, and packaging, ensuring full traceability and optimization at every step.

Built for flexibility, Dexciss ERP empowers pharmaceutical businesses with AI-powered automation and deep industry insights—helping you make smarter, faster decisions with ease.

What Makes Dexciss ERP Sets Apart?

- ✓ **ERP is free, pay only for services.**
- ✓ **Fully optimized, yet easily customizable.**
- ✓ **Built-in Custom Industry Specific Features**
- ✓ **Seamlessly integrates with AI and other tools.**

**10+ Years of
Experience**

**24*7 Customer
Support**

**Worldwide
Presence**

We Understand Your Challenges

■ Regulatory & Compliance Complexities

Pharma companies must comply with FDA, WHO-GMP, Schedule M, and other global standards. Manual compliance tracking increases risk of penalties, recalls, and delayed audits.

■ Complex Manufacturing & Batch Processing

Multi-level BOMs, blending, formulation rules, and rework cycles demand real-time visibility. Manual oversight can result in product inconsistency and wastage.

■ Quality Control & Lab Testing Delays

Frequent quality checks, lab validations, and quarantine releases slow down dispatch if not streamlined. Paper-based tracking causes delays and compliance gaps.

■ Procurement Uncertainty & Supplier Disruptions

APIs and excipients are often imported or seasonally sourced. Supply chain delays, price volatility, and poor coordination can halt production or inflate costs.

■ Expiry, Batch & Inventory Management

Managing product lifecycles with FEFO protocols, batch tracking, and expiry alerts is critical. Lack of automation risks stockouts, overstocking, and compliance issues.

■ R&D Cost Tracking & Documentation

Heavy R&D and clinical investments require accurate tracking of spend, outcomes, and documentation. Disorganized data impacts future planning and filings.

We Understand Your Challenges

■ Financial & Taxation Complexity

Multiple tax structures, foreign exchange variations, and strict price controls increase financial reporting pressure. Manual entries lead to audit risks.

■ Data Silos & System Fragmentation

Using separate tools for sales, inventory, compliance, and production leads to data duplication and poor visibility. Decision-making suffers due to lack of real-time insights.

Key Features

Batch & Expiry Management

Track products by batch, serial number, and expiry dates with FEFO protocols. Ensure traceability, avoid stock wastage, and meet regulatory mandates with precision.

Quality Control & Compliance Automation

Set up automated quality checks at every production stage—raw materials, WIP, and finished goods. Capture lab results, CoAs, and ensure WHO-GMP/FDA compliance seamlessly.

Formulation & BOM Version Control

Manage complex multi-level BOMs for tablets, syrups, capsules, and injectables. Auto-calculate ingredient quantities and handle revisions without disrupting production.

Procurement & Vendor Management

Track vendor performance, automate RFQs, and monitor incoming goods with quality checks. Control costs and ensure timely sourcing of APIs, excipients, and packaging material.

Key Features

Production & Work Order Management

Plan production with stage-wise routing, batch splitting, and equipment tracking. Real-time work order progress visibility ensures smoother floor operations and zero bottlenecks.

Warehouse & Cold Chain Management

Monitor multiple warehouses with temperature control tracking. Prevent spoilage and ensure sensitive drugs are handled as per pharma-grade protocols.

Sales & Distribution Management

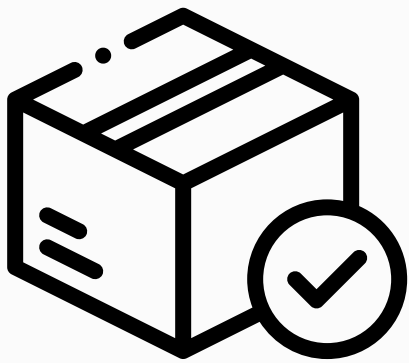

Manage B2B and distributor orders with automated pricing, schemes, credit limits, and shipment tracking. Ensure full visibility across the sales cycle.

Regulatory Reports & Audit Readiness

Generate audit-ready reports, including batch history, validation logs, and electronic CoAs. Be always prepared for inspections with zero last-minute panic.

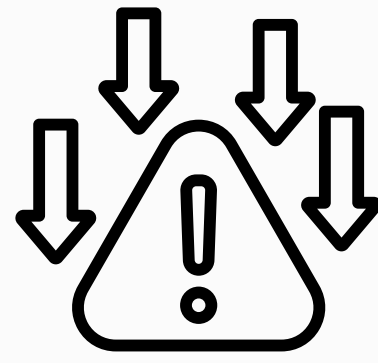

Real Benefits, Real Success

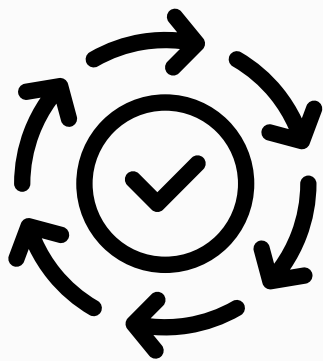

Accelerates market
readiness

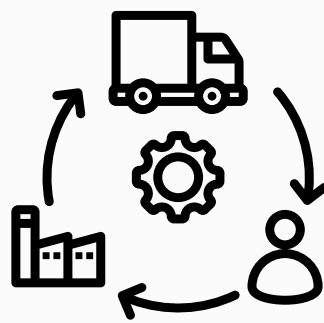

Reduces operational
costs

Mitigates
compliance risks

Boosts product
consistency

Optimizes inventory
turnover

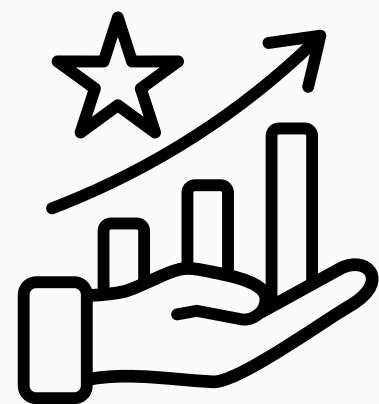

Strengthens supplier
partnerships

Enhances financial
transparency

Expedites sales
cycles

Protects brand
reputation
