Dexciss ERP for
Retail Industry

Sell Smarter, Operate Leaner, Delight Customers –
The All-in-One ERP for Modern Retailers!

Introduction

Retail success today depends on real-time inventory visibility, customer experience, and multi-channel integration. Dexciss ERP brings all these elements together—making it easier to manage stores, warehouses, billing counters, ecommerce portals, and supply chains through a single, integrated system.

Whether you're a chain of outlets or a growing D2C brand, Dexciss ERP offers complete control over:

- Purchasing & Vendor Management
- Centralized Inventory & Warehouse Handling
- Barcode-based In-store Operations
- POS Billing & Customer Checkout
- GST-compliant Finance & Accounting
- CRM & Loyalty Programs
- eCommerce Platform Sync
- Sales Forecasting & Promotions Management

With AI-powered dashboards and mobile access for store-level staff, it's built to scale your retail brand without scaling chaos.

What Makes Dexciss ERP Sets Apart?

ERP is free, pay only for services.

Fully optimized, yet easily customizable.

Built-in Custom Industry Specific Features

Seamlessly integrates with AI and other tools.

| 10+ Years of Experience | 24*7 Customer Support | Worldwide Presence |

We Understand Your Challenges

▍ Inventory Mismatch Across Locations

Manually updating stock across stores and warehouses often leads to overstocking at one location and stockouts at another—hurting both cash flow and customer experience.

▍ Unpredictable Sales & Demand Fluctuations

Festive spikes, clearance dips, or changing product trends make it difficult to plan what to stock and when—especially without AI-driven forecasts.

▍ Checkout Delays & POS Downtime

Slow billing, duplicate entries, or system lags frustrate customers and reduce your daily sales potential.

▍ Inconsistent Pricing & Promotions

Rolling out a discount scheme across 20 stores? Manual uploads and errors can cost you margins and cause disputes with buyers.

▍ Disconnected Online & Offline Channels

If your ecommerce stock doesn't sync with your warehouse and store, you risk overselling, delays, and negative reviews.

▍ Lack of Real-Time Visibility for Decision Makers

By the time the end-of-day report arrives, it's already too late to act on issues like low footfall or underperforming SKUs.

We Understand Your Challenges

Tax Compliance & Reporting Hassles

Missing GST/Tax filings or non-compliant invoices can lead to penalties and disrupted audit cycles.

Customer Retention Challenges

Without loyalty tracking or CRM tools, you miss upselling and re-engagement opportunities with your most valuable buyers.

Key Features

Real-Time, Multi-Location Inventory Management

Track SKU movement across stores, warehouses, kiosks, and online—updated in real time using barcode/QR-based entries. Enables auto-replenishment and central planning.

POS System with Offline Sync

A lightning-fast billing experience—scan, bill, apply discounts, and accept multi-mode payments. Works offline and syncs once reconnected.

AI-Based Demand Forecasting & Auto Reordering

Get dynamic stock suggestions based on past sales, seasonality, and location-level trends. Helps optimize working capital and meet demand peaks confidently.

Promotions, Coupons & Multi-Tier Pricing Engine

Create and launch location-wise discounts, festive bundles, and customer-specific pricing. All rules automatically apply during checkout—no manual override needed.

Key Features

eCommerce Platform Integration

Sync your ERP with leading platforms—auto-update inventory, orders, and customer data. Avoid overselling and unify data across your online and offline worlds.

Customer Loyalty & CRM

Track purchase history, birthdays, and interaction points. Run personalized campaigns, assign reward points, and monitor retention—all in one place.
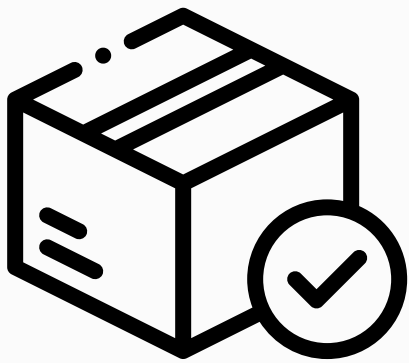

Finance, GST/Tax, and E-invoicing Built In

Auto-generate GST/Tax ready invoices, file returns, manage credit/debit notes, and track profitability by SKU, store, or customer type.

Business Intelligence Dashboards

Real-time dashboards show sales by store, fast/slow-moving SKUs, footfall vs conversion, profitability, inventory ageing, and more—helping you act, not just report.
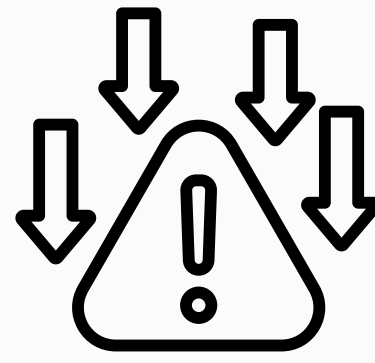

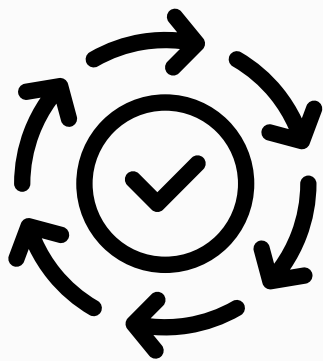

Real Benefits, Real Success
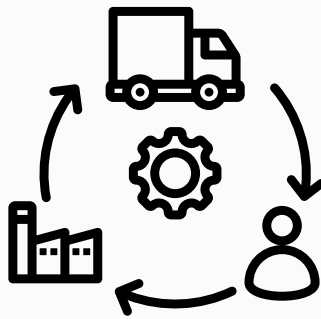

Accelerates market readiness

Reduces operational costs

Mitigates compliance risks

Boosts product consistency
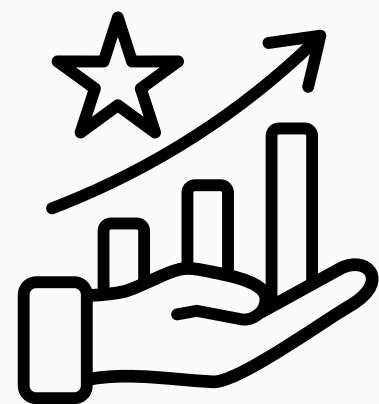

Optimizes inventory turnover

Strengthens supplier partnerships

Enhances financial transparency

Expedites sales cycles

Protects brand reputation
