Dexciss ERP for Logistics & Transport Industry

End-to-End Logistics Management Made Simple

A Complete ERP Platform for FTL, LTL, Fleet and Transport Businesses

Introduction

Dexciss ERP, built on ERPNext, is a comprehensive logistics ERP solution designed specifically for transport and fleet businesses—covering everything from dispatch planning, fleet management, trip tracking, fuel control, expenses, and customer visibility.

Whether you manage **FTL (Full Truck Load) operations, LTL (Part Truck Load) consignments, or last-mile deliveries**, Dexciss ERP helps streamline daily logistics activities, reduce operational costs, and improve delivery efficiency with real-time control and automation.

With **features like** live GPS tracking, digital fuel vouchers, driver allocation, tyre lifecycle management, vendor portals, and integrated expense tracking, logistics companies can operate with complete visibility and accuracy. The system connects vehicles, drivers, warehouses, and customers on a single platform—ensuring smooth, error-free logistics execution.

Built for flexibility and scalability, Dexciss ERP empowers transport businesses with AI-powered insights, automated workflows, and real-time dashboards—helping you run smarter, faster, and more profitable logistics operations.

What Makes Dexciss ERP Sets Apart?

✓ **ERP is free, Unlimited user licenses**

✓ **Fully customizable to your workflows**

✓ **Built-in Logistics Industry Specific Features**

✓ **Seamless integrations with GPS, fuel cards & APIs**

10+ Years of Experience

24*7 Customer Support

Worldwide Presence

We Understand Your Challenges

Disorganized Dispatch Operations

Manual trip planning and poor coordination between vehicles, drivers, and customers lead to delays and inefficiencies.

Lack of Real-Time Visibility

No clear tracking of vehicles, trips, or delivery status results in poor decision-making and customer dissatisfaction.

Driver & Workforce Management Issues

Managing driver allocation, attendance, licenses, and performance manually creates compliance and operational risks.

Maintenance & Asset Tracking Gaps

Unplanned repairs, tyre mismanagement, and spare parts shortages increase downtime and maintenance costs.

Fuel Leakage & Uncontrolled Expenses

Unverified fuel bills, cash advances, and manual expense tracking increase operational costs and financial losses.

Low Fleet Utilization

Idle vehicles, improper scheduling, and unplanned routes reduce productivity and profitability.

Vendor & Settlement Complexities

Multiple transporters, unclear billing, and delayed settlements create disputes and cash flow problems.

Poor Data & Reporting

Scattered data across spreadsheets makes it difficult to track trip costs, margins, and business performance.

Key Features

Transport & Trip Management

Plan, create and track trips from a single platform. Assign vehicles and drivers, manage routes, and monitor trip progress in real time for smooth dispatch operations.

Fleet Management System

Maintain complete vehicle records including documents, maintenance schedules, utilization history, and performance tracking to ensure maximum fleet productivity.

Live GPS Vehicle Tracking

Track vehicles in real time with location, route mapping, stoppage alerts, and ETA monitoring. Gain complete visibility over every running trip.

Fuel Management with Voucher Control

Digitize fuel approvals and vouchers. Track trip-wise fuel consumption, prevent misuse, and reconcile expenses accurately with verified entries.

Tyre Lifecycle Management

Monitor tyre purchase, usage, rotation, and replacement. Reduce tyre expenses and improve vehicle safety with structured lifecycle tracking.

Driver Management & Allocation

Manage driver profiles, licenses, duty assignments, and availability. Allocate the right driver to the right vehicle with compliance tracking.

Vendor & Partner Integration

Automate transporter contracts, billing, and settlements. Manage multiple vendors on one portal with transparent cost tracking.

Cash & Expense Management

Track trip advances, tolls, and expenses in real time. Control cash leakage and generate accurate trip-wise profitability reports.

Key Features

Last-Mile Delivery Mobile App

Enable drivers and delivery teams with mobile apps for POD capture, status updates, and real-time communication.

Spare Parts Management

Track spare inventory, maintenance parts, and service history to reduce vehicle downtime.

Warehouse & Inventory Management

Manage goods movement, stock levels, and locations with accurate inventory control.

Alerts & Geo-Fencing

Get automated alerts for over-speeding, route deviations, delays, and unauthorized stoppages.

MIS & Analytics Dashboard

Real-time dashboards for trips, costs, utilization, and performance insights.

Customer Shipment Tracking Portal

Provide customers with live tracking, ETA updates, and transparent delivery status.
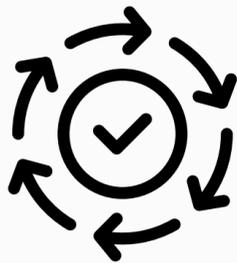

Real Benefits, Real Success

Improves On-Time Deliveries

Reduces Operational Costs

Minimizes Revenue Leakage

Increases Fleet Utilization
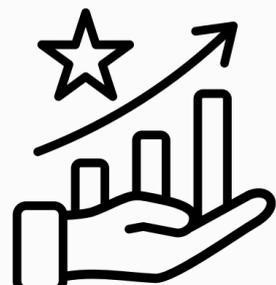

Optimizes Trip Profitability

Strengthens Vendor Collaboration

Enhances financial transparency

Improves Customer Experience

Enables Data-Driven Decisions
